Summary Information

Repository	American Philosophical Society
Title	Miscellaneous Manuscript Maps
Date [inclusive]	1747-1948
Call number	Misc.Maps
Extent	100.0 Item(s)
Extent	Approximately 100 items.
Location	LH-SB-Map Cases
Language	English
Abstract	A listing of miscellaneous manuscript maps that are not associated with any particular collections.

Scope & content

Although most of the Library's manuscript maps are parts of collections, there are almost one hundred individual manuscript maps which were catalogued and filed with the Library's collection of printed maps.

Administrative Information

Publication Information

American Philosophical Society 3/2005

Processing Information

The item level descriptions in this finding aid came directly from *Realms of Gold*, a guide to APS maps authored by Murphy D. Smith in 1991.

Indexing Terms

Genre(s)

- Maps
- Maps and Surveys
- Miscellaneous

Subject(s)

- Pennsylvania History
- Surveying and Maps

Other Descriptive Information

The APS large map collection contains numerous maps from early America.

Bartram, John, 1699-1777	[1750s]	<i>Size:</i> 31 x 38 cm.
---------------------------------	---------	-----------------------------

Individually Catalogued Manuscript Maps (Not in C...

650: [ca.1750s]: At61mvc: Small [Middle Atlantic states, showing rivers and mountains and location of sea shells on the tops of the mountains]

Acquisition Information

Presented by Benjamin Franklin.

As early as 1741, John Bartram sent some fossil sea shells to Sir Hans Sloan; other shells were sent to his London friend Peter Collinson in 1742. He wrote to Collinson in 1743 or 1744 that he had observed such fossils everywhere, "even on the top of the mountain that separates the waters of Susquehanna and St. Lawrence." (William Darlington, *Memorials of John Bartram and Humphry Marshall* [Philadelphia: 1849], p. 169.) Bartram was used to making rough maps of his travels and he made no pretense of being a competent surveyor. He apologized to Collinson for a map which he said was "Clumsily done, —having neither proper instruments nor convenient time," since he was drawing by the early light of dawn or by candlelight.

Franklin wrote his friend Jared Eliot on 16 July 1747 of Bartram's discoveries:

The great Apalachian Mountains, which run from York [Hudson] River back of these Colonies to the Bay of Mexico, show in many Places near the highest Parts of them, Strata Sea Shells, in some Places the marks of them are in the solid Rocks. 'Tis certainly the *Wreck* of a World we live on! We have Specimens of those Sea shell Rocks broken off near the Tops of those Mountains, brought and deposited in our Library [the Library Company of Philadelphia] as Curiosities. If you have not seen the like, I'll send you a Piece. (*The Papers of Benjamin Franklin* [New Haven: Yale University Press: 1961], vol. 3, p. 169.)

The endorsement on the back reads, in Franklin's hand: "Mr. Bartram's Map very curious."

Other Finding Aids

Realms of Gold, 32 (3).

[Middle Atlantic states, showing rivers and mountains and location of sea shells on the tops of the mountains].

Fahlberg, Samuel, 1758-1834	1801	<i>Size:</i> 20.9 x 27.3 cm.
733.1: 1800: F143ssm: Small Special map, representing Man of War Shoal, its distance and bearings from the island of St. Martins, conformable to the discovery of Captain Foulke, Esqr., commanding the British frigate, the Proselite, in the month of May 1801		

Nicholas Collin delivered this map to the Society on 16 April 1802. Collin wrote that Fahlberg "presents by me a special map of a lately discovered dangerous shoal...as an appendage to his map of it [St. Bartholomew], sometimes ago received by the Society; and expresses a solicitious desire that it may be published for the benefit of the many American vessels that trade to that part of the West Indies: believeing this execution the more necessary, as the very frigate in which the discovery was made, though then commanded by another captain, ran aground on that shoal." The members desired Secretary John Vaughan to write and see "if any account can be published" of this "Rock lately discovered south of S. Martins."

cm. Colored.

The endorsement on the back reads: "Found by me in a parcel of Plants collected by F. Pursh w[hi]ch made part of ye Lambert Herbarium, and was bought by me in London at the Lambert sale in 1842. Edward Tuckerman."

In 1807 Pursh kept a "Journal of a botanical excursion in the Northeastern parts of Pennsylvania and in the state of New York." The manuscript was found among the papers of his patron, Benjamin Smith Barton, in 1817. It has been published twice: first in Philadelphia in 1869, and then in 1923 for the Onondaga Historical Association, Syracuse, New York, with notes by William M. Beauchamp. On 3 April 1868 Thomas P. James spoke of various properties of Pursh. He told how the map was drawn and used in the botanical expedition, and he spoke of the history of the map. Asa Gray, the famous botanist, owned it, and wished to present it to the American Philosophical Society and reunite it with the journal. "The Journal and map are now, after a separation of sixty years, united."

Kane, Elisha Kent, 1820-1857

1853-1855

5.0 Item(s)

Individually Catalogued Manuscript Maps (Not in C...

172.3: 1853-55: G895exp: Large Charts
 pertaining to the Second U.S. Grinnell
 Expedition in search of Sir John Franklin,
 under the command of Elisha Kent Kane.

A member of the American Philosophical Society, Kane spoke on 16 November 1855 of various geographical features of the Arctic regions he had seen and displayed his map of the area. He spoke of the progress of the expedition and the difficulties encountered. On 7 December 1855 he exhibited two charts showing his corrections and the new features described on them. These may be the charts Kane displayed and spoke about. See: American Philosophical Society *Proceedings*, vol. 7 (1885): pages 154, 162.

<http://diglib.amphilsoc.org/fedora/repository/graphics:5741>

Du Creux, François, 1596?-1666 n.d. *Insert:*
611: n.d.: C162tnf: Small Tabula novae Franciae, 1660. [copy] Chorographia regionis Huronum. Hodie desertae. Size: 34.6 x 44.3 cm. Colored.

Copied from François Du Creux, *Historiae Canadensis seu novae Franciae libri decem ad annum usque Christi 1656* (Paris: 1664). This was printed in the Champlain Society *Publications*, volumes 30-31, translated by Percy J. Robinson (Toronto: 1951).

A note by P. J. Robinson states that this map deserves study and is of special value on account of the inset map of the Huron country, the improved outline of the lakes, especially Lake Ontario, and Georgian Bay, the marking of the trails to the Hudson Bay and of the new route discovered by the Groseilliers and Radisson from Lake Nipigon.
