Summary Information

Repository	American Philosophical Society
Creator	Anonymous
Title	Traité de physique et de chymie, ca. 1800
Date	Circa 1800
Call number	Mss.537.G18
Extent	1.0 Volume(s) 1 volume, 163 p.
Extent	1 volume, 163 p.
Location	LH-MV-E-9
Language	French
Container	1
Abstract	This treatise includes experiments on electricity (with mentions of B. Franklin), ballooning (mentions of J. P. Blanchard), pharmacology, chemistry, and hydraulics. Included is a sketch of Woulfe's bottle for passing gases through liquids (Peter Woulfe, 1767).

Administrative Information

Publication Information

American Philosophical Society

Provenance

Custodial History

This volume was once owned by Alfred Lejourdan, engineer and director of plants and zoology in Marseilles.

Indexing Terms

Family Name(s)

- Gariel.
- Woulfe, Peter, -- ca. 1727-1803.

Genre(s)

- Educational Material
- Foreign Language
- Manuscript Essays
- Notebooks
- Scientific Data

Personal Name(s)

- Blanchard, Jean-Pierre, 1753-1809
- Franklin, Benjamin, 1706-1790
- Lejourdan, Alfred

Subject(s)

- Balloons.
- Chemistry -- Experiments.
- Education
- Electricity -- Early works to 1850.
- Gases.
- Hydraulics.
- Pharmacology.
- Science -- History.
- Science and Technology
- Technology -- History.

Other Descriptive Information

This work is signed "G" on the title page, possibly short for Gariel (the words "Grandpere Gariel" are written in pencil, in an unknown hand, on the title page).

Other Descriptive Information

This beautifully bound volume contains numerous essays on scientific developments that occurred in the 18th century. The text of the notebook is written so that the manuscript appears like a published work. Among the topics discussed are electricity, physics, balloons, pharmacology, and an invention by Peter Woulfe. The notebook is in French.
