Summary Information

Repository	American Philosophical Society
Creator	Speck, Frank Gouldsmith, 1881-1950
Title	Frank Gouldsmith Speck Cherokee Collection
Date [inclusive]	1880-1948
Call number	Mss.572.97.Sp3L
Extent	0.5 Linear feet
Location	LH-MV-B-11
Language	English
Abstract	<p>From the 1920s through the 1940s, the University of Pennsylvania anthropologist Frank Gouldsmith Speck worked on Cherokee language and culture with his primary consultant, Will West Long. Raised in Big Cove, North Carolina, Long was a respected elder and spent much of his adult life attempting to record and preserve traditional Cherokee culture. The Speck Cherokee Collection consists of diaries, accounts, and medicinal texts in Cherokee collected by Will West Long and Morgan Calhoun, accompanied by notes by Speck and John Witthoft. Among these are several diaries kept by Long (mostly 1904-1917), records of the Gadugi (a Cherokee mutual aid group), accounts, records of births and deaths at Big Cove, Cherokee-English vocabularies, and material collected on Cherokee botany collected by James Mooney in 1887. Several of the items contain information on Cherokee medicine, including formulae and curing charms.</p>

Background note

The ethnographer Frank Gouldsmith Speck was unusual among the students of Franz Boas in choosing to study the Indian cultures of the eastern United States that he believed were in severe decline. As one of Boas' first graduate students at Columbia, Speck worked extensively in the state of Connecticut, attempting to "salvage" what remained of the native cultures, recording, for example, the Mohegan Pequot language from one of its last native speakers, Fidelity Hoscott Fielding. After completing his degree in 1908, Speck became Professor of Anthropology at the University of Pennsylvania, becoming one of the best known in his research among the Algonquian peoples of the northeast.

Beginning in the 1920s, Speck began to expand the scope of his research to include Indian populations in the mid-Atlantic states and the southeast. In his studies of the North Carolina Cherokee, Speck's primary consultant and collaborator was Will West Long. Born in Big Cove, N.C., on January 25, 1870, Long was raised in traditional Cherokee. At 25, he studied at Hampton Institute in Virginia, and spent five years after that working in Massachusetts before returning to Big Cove during the fall of 1904. For 28 years he was a member of the Cherokee tribal council, and served as clerk for an additional two, but Long played a key role in collecting and transmitting information about traditional Cherokee culture to younger generations, passing on knowledge about Cherokee medicine, carving, music and dance, and language. Long, who died in 1947, was listed as a co-author of Speck's and Leonard Bloom's on *Cherokee Dance and Drama* (Norman, Okla.: 1951).

Scope & content

The Frank Speck Cherokee Collection consists of diaries, accounts, and medicinal texts in Cherokee collected by Will West Long and Morgan Calhoun, accompanied by notes by Speck and John Witthoft. These include several diaries kept by Long (mostly 1904-1917), records of the Gadugi (a Cherokee mutual aid group), accounts, records of births and deaths at Big Cove, and material collected on Cherokee botany collected by James Mooney in 1887. Several of the items contain information on Cherokee medicine, including formulae and curing charms.
